Organizing Committee of The Symposium on Ring Theory and Representation Theory

The Symposium in 2019 was held jointly with the 8th China-Japan-Korea International Symposium on Ring Theory at Nagoya University from August 26 to August 31. Both were held as the 19th Nagoya International Mathematical Conference by Graduate School of Mathematics, Nagoya University.

The Symposium on Ring Theory and Representation Theory has been held annually in Japan and the Proceedings have been published by the organizing committee. The first Symposium was organized in 1968 by H. Tominaga, H. Tachikawa, M. Harada and S. Endo. After their retirement a new committee has been formed in 1997 to manage the Symposium, and its committee members are listed in the web page

<http://www.ring-theory-japan.com/ring/h-of-ringsymp.html>.

The present members of the committee are S. Kawata (Nagoya City Univ.), I. Kikumasa (Yamaguchi Univ.), I. Mori (Shizuoka Univ.), and T. Nishinaka (Univ. of Hyogo).

The Proceedings of each Symposium are edited by the program organizer. If you wish to have these Proceedings, please ask the program organizer of each Symposium or one of the committee members.

For information on ring theory and representation theory of groups and algebras (including schedules of meetings and symposiums), as well as ring mailing list service for registered members, please refer to the following websites, which are edited by K. Yamaura (Univ. of Yamanashi):

<http://www.ring-theory-japan.com/ring/> (in Japanese)

<http://www.ring-theory-japan.com/ring/japan/> (in English)

The Symposium in 2020 will be held at Yamaguchi University from September 14 (Mon) to September 17 (Thu). The program organizer is Yoshitomo Baba (Osaka Kyoiku University), and the local organizer is Yosuke Kuratomi (Yamaguchi University).

Contents

Preface	vi
Program (English)	vii
On balanced Auslander–Dlab–Ringel algebras Takahide Adachi, Aaron Chan and Mayu Tsukamoto	1
g -polytopes of Brauer graph algebras Toshitaka Aoki	6
Wide subcategories and lattices of torsion classes Sota Asai (淺井聡太)	12
Cohen–Macaulay modules over Yoneda algebras Norihiro Hanihara	18
A remark on graded countable Cohen–Macaulay representation type Naoya Hiramatsu	21
On the 2-test modules for projectivity and weakly \mathfrak{m} -full ideals Kei-ichiro Iima	26
Hochschild cohomology of Beilinson algebras of graded down-up algebras Ayako Itaba and Kenta Ueyama	29
The Hochschild cohomology of a class of exceptional periodic selfinjective algebras of polynomial growth Tomohiro Itagaki and Hideyuki Koie	35
A Batalin–Vilkovisky differential on the complete cohomology ring of a Frobenius algebras Tomohiro Itagaki, Katsunori Sanada and Satoshi Usui	39
A characterization of local rings of countable representation type Toshinori Kobayashi	46
An application of a theorem of Sheila Brenner for Hochschild extension algebras of a truncated quiver algebra Hideyuki Koie	51
Mutations for star-to-tree complexes and pointed Brauer trees Yuta Kozakai	55

AS-regularity of geometric algebras whose point schemes are plane elliptic curves Masaki Matsuno	62
Happel’s functor and homologically well-graded Iwanaga–Gorenstein algebras Hiroyuki Minamoto and Kota Yamaura	66
Noncommutative Matrix Factorizations and Noncommutative Knörrer’s Periodicity Izuru Mori and Kenta Ueyama	73
Pure derived categories and weak balanced big Cohen–Macaulay modules Tsutomu Nakamura	81
On Thompson’s group F and its group algebra Tsunekazu Nishinaka	88
General heart construction and the Gabriel–Quillen embedding Yasuaki Ogawa	96
On liftable DG modules over a commutative DG algebra Maiko Ono	102
The structure of Sally modules and normal Hilbert coefficients Kazuho Ozeki	108
When is a quasi-discrete module quasi-projective? Yoshiharu Shibata (柴田義大), Isao Kikumasa (菊政勲) and Yosuke Kuratomi (倉富要 輔)	116
Constructions of rejective chains Mayu Tsukamoto	123
On the weakly Iwanaga–Gorenstein property of gendo algebras Takuma Aihara, Aaron Chan and Takahiro Honma	130
On the gendo-symmetric algebra of a trivial extension algebra Takuma Aihara, Aaron Chan and Takahiro Honma	133

Preface

The 52nd Symposium on Ring Theory and Representation was held at Nagoya University. This symposium was jointed with the 8th China-Japan-Korea International Symposium on Ring Theory and the 19th Nagoya International Mathematical Conference. The symposium and this proceedings are financially supported by

Osamu Iyama (Nagoya University), Izuru Mori (Shizuoka University)
Grant-in-Aid for Scientific Research (B) 16H03923, JSPS
the 19th Nagoya International Mathematical Conference, Nagoya University,
Hideto Asashiba (Shizuoka University)
Grant-in-Aid for Scientific Research (C) 18K03207, JSPS
Akira Masuoka (Tsukuba University)
Grant-in-Aid for Scientific Research (C) 17K05189, JSPS
Laurent Demonet (Nagoya University)
Grant-in-Aid for Young Scientists (B) 17K14160, JSPS
Tsunekazu Nishinaka (University of Hyogo)
Grant-in-Aid for Scientific Research (C) 17K05207, JSPS
Yousuke Kuratomi (Yamaguchi University)
Grant-in-Aid for Scientific Research (C) 15K04821, JSPS
Masahisa Sato (Aichi University)
Grant-in-Aid for Scientific Research (C) 16K01106, JSPS

This volume consists of the articles presented at the symposium. We would like to thank all speakers and coauthors for their contributions.

We would also like to express our thanks to all the members of the organizing committee (Professors Shigeto Kawata, Isao Kikumasa, Izuru Mori and Tsunekazu Nishinaka) and the organizers of CJK International Symposium (Professors Hideto Asashiba, Yousuke Kuratomi, Osamu Iyama and Masahisa Sato) for their helpful suggestions concerning the symposium. Finally we would like to express our gratitude to the administration members of Nagoya Conference, Professor Kota Yamaura and students of Nagoya University who contributed in the organization of the symposium.

Masahisa Sato

December, 2019

The 52nd Symposium on Ring Theory and Representation Theory

Program

August 26 (Monday)

- 11:20–12:10** Yuji Yoshino (Okayama University, JPN)
Auslander–Bridger theory for projective complexes over commutative Noetherian rings
- 13:40–14:00** Takuma Aihara (Tokyo Gakugei University, JPN)
On the weakly Iwanaga–Gorenstein property of gendo algebras
- 13:40–14:00** Tsiu-Kwen Lee (National Taiwan University, TWN)
A note on Skolem-Noether algebras
- 13:40–14:00** Ziyu Guo (Beijing University of Technology, CHN)
Cohomology rings and application in hypernormal form for a class of 4-dimensional vector fields
- 14:10–14:30** Takahiro Honma (Tokyo University of Science, JPN)
On the gendo-symmetric algebra of a trivial extension algebra
- 14:10–14:30** Tai Keun Kwak (Daejin University, KOR)
On CRP rings
- 14:10–14:30** Jung-Miao Kuo (National Chung Hsing University, TWN)
Partial group actions and partial Galois extensions
- 14:40–15:00** Takahide Adachi (Osaka Prefecture University, JPN)
On balanced Auslander–Dlab–Ringel algebras
- 14:40–15:00** Nam Kyun Kim (Hanbat National University, KOR)
Characterizations of radicals in skew polynomial and skew Laurent polynomial rings
- 14:40–15:00** Tsunekazu Nishinaka (University of Hyogo, JPN)
On Thompson’s group F and its group algebra
- 15:10–15:30** Mayu Tsukamoto (Yamaguchi University, JPN)
Constructions of rejective chains
- 15:10–15:30** Kui Hu (Southwest University of Science and Technology, CHN / Kyungpook National University, KOR)
Some results on Noetherian Warfield domains
- 15:10–15:30** Diah Junia Eksi Palupi (Universitas Gadjah Mada, IDN)

The construction of a continuous linear representation from a topological group into topological module space over principle ideal domain

15:10–15:30 Diah Junia Eksi Palupi (Universitas Gadjah Mada, IDN)

The construction of a continuous linear representation from a topological group into topological module space over principle ideal domain

16:00–16:20 Toshinori Kobayashi (Nagoya University, JPN)

A characterization of local rings of countable representation type

16:00–16:20 Jianlong Chen (Southeast University, CHN)

Generalized inverses and clean decompositions

16:00–16:20 Nanqing Ding (Nanjing University, CHN)

On Enochs conjecture

16:30–16:50 Naoya Hiramatsu (National Institute of Technology, JPN)

A remark on graded countable Cohen–Macaulay representation type

16:30–16:50 Xiaofeng Chen (Southeast University, CHN)

The right core inverses of a product and a companion matrix

16:30–16:50 Lixin Mao (Nanjing Institute of Technology, CHN)

Relative coherent modules and semihereditary modules

17:00–17:20 Kei-ichiro Iima (National Institute of Technology, JPN)

On the 2-test modules of projectivity and weakly \mathfrak{m} -full ideals

17:00–17:20 Xiankun Du (Jilin University, CHN)

Triangularization of matrices and polynomial maps

17:00–17:20 Manoj Kumar Patel (National Institute of Technology Nagaland, IND)

A note on FI -semi injective modules

August 27 (Tuesday)

9:00–9:50 Bernhard Keller (University of Paris 7, FRA)

Tate–Hochschild cohomology from the singularity category

10:00–11:10 Tsutomu Nakamura (University of Verona, JPN)

Pure derived categories and weak balanced big Cohen–Macaulay modules

11:20–12:10 Sei-Qwon Oh (Chungnam National University, KOR)

Relationships between quantized algebras and their semiclassical limits

13:40–14:00 Sota Asai (Research Institute for Mathematical Sciences, JPN)

Wide subcategories and lattices of torsion classes

13:40–14:00 Naoki Endo (Waseda University, JPN)

Almost Gorenstein Rees algebras

- 13:40–14:00** Masahisa Sato (Aichi University, JPN)
Is Ware’s problem true or not?
- 14:10–14:30** Toshiya Yurikusa (Nagoya University, JPN)
Density of g -vector cones from triangulated surfaces
- 14:10–14:30** Ryotaro Isobe (Chiba University, JPN)
Ulrich ideals in hypersurfaces
- 14:10–14:30** Yoshiharu Shibata (Yamaguchi University, JPN)
When is a quasi-discrete module quasi-projective?
- 14:40–15:00** Toshitaka Aoki (Nagoya University, JPN)
 g -polytopes of Brauer graph algebras
- 14:40–15:00** Kazuho Ozeki (Yamaguchi University, JPN)
The structure of Sally modules and normal Hilbert coefficients
- 14:40–15:00** Gangyong Lee (Chungnam National University, KOR)
Rudimentary rings: Rings have a faithful indecomposable endoregular module
- 15:10–15:30** Yuta Kozakai (Shibaura Institute of Technology, JPN)
Mutations for star-to-tree complexes and pointed Brauer trees
- 15:10–15:30** Naoyuki Matsuoka (Meiji University, JPN)
Efficient generation of ideals in core subalgebras of the polynomial ring $k[t]$ over a field k
- 15:10–15:30** Derya Keskin Tütüncü (Hacettepe University, TUR)
Baer–Kaplansky classes in categories
- 16:00–16:20** Aaron Chan (Nagoya University, JPN)
Recollement of comodule categories over coalgebra objects
- 16:00–16:20** Yoshitomo Baba (Osaka Kyoiku University, JPN)
On two sided Harada rings and QF rings
- 16:00–16:20** Hwankoo Kim (Hoseo University, KOR)
A new semistar operation on a commutative ring and its applications
- 16:30–16:50** Zhaoyong Huang (Nanjing Univeristy, CHN)
The extension dimension of Abelian categories
- 16:30–16:50** Thomas Dorsey (Center for Communications Research, USA)
Questions and counterexamples on strongly clean rings

- 16:30–16:50** Izuru Mori (Shizuoka University, JPN)
Noncommutative Matrix Factorizations and Knörrer’s Periodicity Theorem
- 17:00–17:20** Na’imah Hijriati (Universitas Gadjah Mada, IDN)
On representation of a ring with unity on a module over a ring with unity
- 17:00–17:20** Meimei Jiang (Jiangsu Second Normal University, CHN)
McCoy property over Jacobson radicals
- 17:00–17:20** Kenta Ueyama (Hirosaki University, JPN)
Knörrer’s periodicity for skew quadric hypersurfaces

August 28 (Wednesday)

- 9:00–9:50** Pace P. Nielsen (Brigham Young University, USA)
Nilpotent polynomials with non-nilpotent coefficients
- 10:20–11:10** Haruhisa Enomoto (Nagoya University, JPN)
The Jordan–Hölder property, Grothendieck monoids and Bruhat inversions
- 11:20–12:10** Jiwei He (Hangzhou Normal University, CHN)
Noncommutative Auslander theorem and noncommutative quotient singularities
- 13:40–14:00** Kunio Yamagata (Tokyo University of Agriculture and Technology, JPN)
On a problem of socle-deformations of self-injective orbit algebras
- 13:40–14:00** Ayako Itaba (Tokyo University of Science, JPN)
Hochschild cohomology of Beilinson algebras of graded down-up algebras
- 14:10–14:30** Hideto Asashiba (Shizuoka University, JPN)
2-categorical Cohen–Montgomery duality between categories with I -pseudoactions and I -graded categories for a small category I
- 14:10–14:30** Guodong Shi (Southeast University, CHN)
 Q -graded Hopf quasigroups
- 14:10–14:30** Tomohiro Itagaki (Tokyo University of Science, JPN)
The Hochschild cohomology of a class of exceptional periodic selfinjective algebras of polynomial growth
- 14:40–15:00** Yasuaki Ogawa (Nagoya University, JPN)
General heart construction and the Gabriel–Quillen embedding
- 14:40–15:00** Linlin Liu (Southeast University, CHN)
Rota–Baxter H -operators and pre-Lie H -pseudoalgebras over a cocommutative Hopf algebra H
- 14:40–15:00** Hideyuki Koie (National Institute of Technology, JPN)

An application of a theorem of Sheila Brenner for Hochschild extension algebras of a truncated quiver algebra

- 15:10–15:30** Xuefeng Mao (Shanghai University, CHN)
DG polynomial algebras and their homological properties
- 15:10–15:30** Shenglin Zhu (Fudan University, CHN)
Structures of irreducible Yetter-Drinfeld modules over quasi-triangular Hopf algebras
- 15:10–15:30** Satoshi Usui (Tokyo University of Science, JPN)
A Batalin–Vilkovisky differential on the complete cohomology ring of a Frobenius algebra
- 16:00–16:20** Haibo Jin (Nagoya University, JPN)
Cohen–Macaulay differential graded modules and negative Calabi–Yau configurations
- 16:00–16:20** Tongsuo Wu (Shanghai Jiao Tong University, CHN)
Boolean graphs – A Survey
- 16:00–16:20** Dong Yeol Oh (Chosun University, KOR)
The chain conditions on ideals in composite generalized power series rings
- 16:30–16:50** Norihiro Hanihara (Nagoya University, JPN)
Cohen–Macaulay modules over Yoneda algebras
- 16:00–16:20** Yuehui Zhang (Shanghai Jiao Tong University, CHN)
Directed partial orders over non-Archimedean fields
- 16:30–16:50** Mi Hee Park (Chung-Ang University, KOR)
Noetherian-like properties in polynomial and power series rings
- 17:00–17:20** Kota Yamaura (University of Yamanashi, JPN)
Happel’s functor and homologically well-graded Iwanaga–Gorenstein algebras
- 17:00–17:20** Shaotao Zhu (Beijing University of Technology, CHN)
Quaternion ring and application in hypernormal form of 4 dimensional semi-simple nonlinear dynamical systems
- 17:00–17:20** Andreas Reinhart (Incheon National University, KOR)
On the monoid of ideals of orders in quadratic number fields
- 17:30–** Conference dinner

August 29 (Thursday)

9:00–9:50 Michał Ziemkowski (Warsaw University of Technology, POL)
Lie solvability in matrix algebras

10:20–11:10 Hiroyuki Minamoto (Osaka Prefecture University, JPN)
On a cubical generalization of preprojective algebras

11:20–12:10 Xianhui Fu (Northeast Normal University, CHN)
Ideal approximation theory

August 30 (Friday)

9:00–9:50 S. Paul Smith (University of Washington, USA)
Elliptic algebras

10:20–11:10 Yoshiyuki Kimura (Osaka Prefecture University, JPN)
Twist automorphism of quantum unipotent cells and the dual canonical bases

11:20–12:10 Nan Gao (Shanghai University, CHN)
A functorial approach to monomorphism category for species

13:40–14:00 De Chuan Zhou (Southwest University of Science and Technology, CHN)
Hoseo University, KOR)
On an open problem concerning the small finitistic dimension of a commutative ring

13:40–14:00 Iwan Ernanto (Universitas Gadjah Mada, IDN)
Arithmetic modules over generalized Dedekind domain

13:40–14:00 Ryo Kanda (Osaka University, JPN)
The characteristic variety of an elliptic algebra

14:10–14:30 Kaori Shimada (Meiji University, JPN)
On the radius of the category of extensions of matrix factorizations

14:10–14:30 Sutopo (Universitas Gadjah Mada, IDN)
Positively Graded rings which are maximal orders and Generalized Dedekind Rings

14:10–14:30 Masaki Matsuno (Shizuoka University, JPN)
AS-regularity of geometric algebras of plane cubic curves

14:40–15:00 Shinya Kumashiro (Chiba University, JPN)
The Auslander–Reiten conjecture for non-Gorenstein rings

- 14:40–15:00** Kazunori Nakamoto (University of Yamanashi, JPN)
An application of Hochschild cohomology to the moduli of subalgebras of the full matrix ring II
- 15:10–15:30** Maiko Ono (Okayama University, JPN)
On liftable DG modules over a commutative DG algebra
- 15:10–15:30** Indah Emilia Wijayanti (Universitas Gadjah Mada, IDN)
On generalized Dedekind modules over generalized Dedekind domain
- 16:00–16:20** Erik Darpö (Nagoya University, JPN)
Functors between higher cluster categories of type A
- 16:00–16:20** Guisong Zhou (Ningbo University, CHN)
The structure of connected (Hopf) algebras
- 16:30–16:50** Yingying Zhang (Hohai University, CHN)
Semibricks, wide subcategories and recollements
- 16:30–16:50** Libin Li (Yangzhou University, CHN)
The center subalgebra of the quantized enveloping algebra of a simple Lie algebra revisited
- 17:00–17:20** Xiaojin Zhang (Nanjing University of Information Science and Technology, CHN)
Tilting modules over Auslander–Gorenstein algebras
- 17:00–17:20** Zhixiang Wu (Zhejiang University, CHN)
Zhixiang Wu (Zhejiang University, CHN)

August 31 (Saturday)

- 9:00–9:50** Gyu Whan Chang (Incheon National University, KOR)
Unique factorization property of non-UFDs
- 10:20–11:10** Kenichi Shimizu (Shibaura Institute of Technology, JPN)
Action functor formalism
- 11:20–12:10** Susumu Ariki (Osaka University, JPN)
On cyclotomic quiver Hecke algebras of affine type
- 14:00–14:50** Pu Zhang (Shanghai Jiao Tong University, CHN)
Gorenstein-projective and semi-Gorenstein-projective modules
